HAZY, FOGGY OR BLURRY VISION	YES	NO

Cataract surgery can almost always be safely postponed until you feel you need better vision. However, if you feel at all hampered by the best vision that glasses can provide, then cataract surgery becomes a reasonable option. If stronger glasses won't improve your vision anymore and if the only way to help you see better is cataract surgery, do you feel your vision problem is bad enough to consider cataract surgery now? **YES** **NO**
